SPECIAL FEATURES

Omega 601 Superior Irrigation Pump Oil is the high-strength oil developed for drip-lubrication of water-pumping systems.

- **Omega 601** is quality engineered specifically for use in turbine pumps, water wheels & irrigation systems.
- **Omega 601** has superior additives to prevent foaming – ensure a high level of resistance to oxidation & rust.
- **Omega 601** enhanced lubricity enables extended operation of equipment without close supervision.

OUTSTANDING PROPERTIES

Omega 601 is the superior irrigation pump oil that:

- Is made from only the finest paraffinic base oils for uncompromising quality.
- Provides fast water separation – prevents oil from emulsifying.
- Has high viscosity index to prevent thinning in hot weather or thickening in cold weather.
- Resists chemical attack and provides long-term protection even in heavily polluted conditions.

USE FOR

Omega 601 is a stable, viscous, fine film and high-strength lubricant developed for maximum lubrication protection of turbine pumps, water wheels and irrigation systems. **Omega 601** is made with the finest base oils and blended for long-term reliability.

Use **Omega 601** in water-pumping systems.
